REVOLUTIONIZE THE WAY YOU DO LAUNDRY

Fern Gunderson, Creator of the Complete Laundry System including the Wonder Laundry Ball and Wonder Dryer Balls.

I have always loved water. My upbringing on a farm in Iowa as a young girl in the 1950s fostered that love. Years ago, a doctor diagnosed me with colitis and told me that I would have it for the rest of my life. I turned to the natural health world for solutions and found a supplement in Canada that allowed my body to rid itself of the disease.

That event changed the way I approach life. I have since studied and have become a strong believer in holistic care and all the good things that you can do for your body and the earth through natural means. I have become educated

in many different areas and have received alternative training in different areas.

In 1995, I was in northern Arizona at a meeting with some retired, wealthy

physicists. We were discussing different uses of water. They suggested that I return to Iowa, take the ideas that we came up with, and take them to market.

I worked for several years perfecting a formula, and in September 1997, I introduced the Laundry Ball. At that time it was called the GLB, now it is called the

Wonder Laundry Ball.

I have taken the studies of Dr. Emoto to heart and implemented them in the creation of the Wonder Laundry Ball. I only let people who are positive come into my building where I create the Wonder Laundry Ball in Holstein, Iowa. Many people may not understand this concept, but the energy that I put into the creation of the Wonder Laundry Ball is the caring of the love of the earth and I strongly believe that it really makes a difference.

The shell of the Wonder Laundry Ball is about 2 3/4 inches in diameter and is made from a virgin PVC/vinyl. The internal contents are a frequency enhanced mineral blend. I fill the ball with just enough of the formula to have room for the minerals to move around while it is agitating in the washer. When the minerals are hitting each other, an energy field is created. This energy field penetrates through the hous-

Fern Gunderson with her son Alyn

ing of the ball and takes away the surface tension of each water molecule, making the water very thin or fine. When the water is in that state, it can go through the fibers of the fabric. It is actually the water that does all of the cleaning when it is in this state.

The water created from the Wonder Laundry Ball actually helps clean all the old detergent fillers out of the garments. When left in the garments, the residue

Continued on page 4

Personal Experiences with the Wonder Laundry Ball

Now I Look Forward to Doing My Laundry

Barbara Cleary • I have used the Wonder Laundry Ball for three years,

and now I actually look forward to doing laundry because I know I will get great results. The only other laundry product I use is to spot treat stains. I simply keep the Wonder Laundry Ball in the washer all the time. I take a sorted, spot treated load, toss it in the washer, push the buttons, and walk away. It really is that simple.

No more detergents, oxygen whiteners, fabric softeners, vinegar, or special rinses. Nothing but the Wonder Laundry Ball.

My first experience using the Wonder Laundry Ball was with peach colored bath towels that came out looking brighter and smelling like they were hung outdoors on a clean breezy day.

I put them in the dryer with the Wonder Dryer Balls without the cancer causing dryer sheets that I had been using, and the drying time was cut in half.

As I was folding the towels, I was truly amazed at how new they looked.

I also have used the Wonder Laundry Ball in other ways. The first thing I do is toss the Wonder Laundry Ball into a bucket. Then I fill the bucket to the top with cold water and watch the ball spin. I let the water spill over the top of the bucket, then I rinse it out so that all of the old suds and other soil is eliminated. The bucket is now ready to make "Ball" water that is clear and ready to do other jobs.

I have personally washed huge windows, patio furniture, tile floors, mirrors, counters, and table tops to just name a few items. I soak a cloth in the ball water, wipe the surface of the item, take a few dry cloths and firmly press down to wipe the water off. Then I take another dry

The Problem

"Children have a higher respiratory rate than adults, so they inhale three times the amount of contaminants, ie: chemical residues left in clothing and bedding. But, because their detoxifying systems aren't fully developed, they can't filter toxins as adults do.

"We now have a higher rate of kids with cancer and learning disabilities than ever before."

Bill Adler Jr.

The Whole Earth Quiz Book:
How Well Do You Know your Planet?

The Solution

The Wonder Laundry Ball cleans clothes without using chemicals or detergents. Thereby lessening your exposure to toxins.

Printed on Over 65% Recycled Material • Made in the USA

ISSN 1942-079X

9 771942 079003

PERSONAL EXPERIENCES WITH

cloth and gently glide it over for a final shine with no smudges or streaks.

I have cleaned my entire vehicle inside and out with one bucket of "Ball" water and two cloths.

One time, I cleaned all four special chrome wheels and lug nuts on my car that were encased in black gunk. I simply let the "Ball" water run on the wheels, wiped the inside spokes, wiped around each lug nut, and wiped the chrome itself. It took about 20 minutes to do all four wheels, and they looked like they were professionally cleaned.

Another use I have for "Ball" water is to clean my jewelry. I make some "Ball" water and then pour it into old drinking glasses. I put my rings in one, earrings into another, and other jewelry into other glasses. I use an old toothbrush to brush them and then rinse them in more "Ball" water and dry them with a clean cloth. The jewelry shines and looks great.

I also use the Wonder Laundry Ball in the bathtub. To start, I fill the bathtub with a little water and toss in the ball for twenty to thirty seconds. Then I rinse the tub with the "Ball" water and drain it to clean the tub from old residue. Then I refill the tub with the Wonder Laundry Ball and remove it when I get in to soak.

I have found that my skin is cleaner and much softer, and my back pains and aches have greatly diminished.

I shared the Wonder Laundry Ball with some of my friends who used it during a very cold winter. After a week, my friend's husband was a believer, because his back pain was forgotten, he stopped itching, and found he was using less lotion.

His wife had added the Wonder Laundry Ball to his bath water without his knowledge. When he found out it was the Wonder Laundry Ball that made the difference, since it was the only thing that he did differently, he was amazed.

Another friend created "Ball" water for her son. When she went to get him out of the bathtub he was completely clean of all the dirt and he said, "Mom, I feel like a brand new kid!"

I also use the Wonder Laundry Ball to create "Ball" water to clean my sunglasses, makeup brushes, crystal, chandeliers, computer screens, and sink faucets to name

just a few. I even use "Ball" water to water plants and cut flowers.

The nicest part is the money and time that I save. There are no more extra cleaning products, detergents, auto products, or glass cleaner. No more heavy detergent bottles to bring in from the store. I have more free space and free time.

It's water! No toxic fumes or poisonous cleaners. It's amazing and I love it!

I'm Not Overwhelmed Any More

Debbie Ballantyne • I am a mother with a large family, large home, and lots of guests. My laundry often overwhelms me. I love the Wonder Laundry Ball because it really helps lower the cost of cleaning supplies and my laundry is really clean. I love having sheets that are fresh and

not chemical smelling.

I have tested the Wonder Laundry Ball with very dirty and smelly laundry and it all comes out beautifully. Sometimes I need to spot treat, but generally my laundry is worry free.

Odors from Farm Gone

Brian Decker • I have always worked very hard. Recently I injured my back while working at a farm. I have never been able to sit still and since my injury did not allow me to go back to work, I began helping more around the house.

After I started using the Wonder Laundry Ball in the clothes washer and the Wonder Dryer Balls in my clothes dryer, I noticed a significant difference with my clothes. My family's clothes are as clean as they have ever been and my socks are absolutely white. I have recommended the complete laundry system to my family and friends.

I told my brother, who owns a tanning salon, that the Complete Laundry System would cut his costs and make his towels a lot fluffier for his customers.

Before I started using the Wonder Laundry Ball, I purchased two bottles of detergent and they are still sitting on my shelf months later. Thank you!

Four Months with No Detergents

John Kestler • There are times when you have so much success with a product that you can't stop talking about it. That is how I feel about the Complete Laundry System.

I discovered the Wonder Laundry and Dryer Balls four months ago and I have never enjoyed doing the laundry as much as I do now. My old routine was to start the wash, go back to add soap enhancer, then go back and add an oxygen additive to whiten the clothes.

Now my routine is start the wash with the Wonder Laundry Ball and no soap and come back in an hour. Then I move the clothes to the dryer with the Wonder Dryer Balls and turn on the dryer. When I come back, the clothes are dry with no wrinkles or problems.

These last four months have been great because I have not spent any money at all on any laundry products. Sometimes a product can make life better and this is

definitely one of those times.

No More Laundry Soap Allergies

Rosemarie Pierron • About 20 years ago I started having allergy problems. I found out that I was allergic to many different things and one in particular was the laundry soap I used. Throughout the next year, I tried many different kinds of laundry soap until I finally found one that I could use. After a few years, the company changed the ingredients in that laundry soap and I had to look for another soap to use.

Around the same time, my sister-in-law opened an herb store and carried a Wonder Laundry Ball in her store so I decided to try it.

For over 10 years, I have not purchased any laundry soap, fabric softener, or static guard sheets and my clothes are clean, fluffy, have no static, and no more laundry allergies. Natural is better and the Wonder Laundry Ball is the best!

Lab Tests Prove It Works

Simon Fuller • I work in radio sales and our station runs various promotions for our advertisers. Twice a year, we have an auction program. For this program businesses trade their goods and services in return for advertising. We then sell these items to our listeners at a discounted price. It is a win-win situation for our listeners and for our advertisers, so it is very popular.

We have had the Complete Laundry System on our show quite a few times and the response has been terrific.

People will call our program to rave about the successes they have had and insist on buying more for their friends and family.

One caller sticks in my memory because of his unique situation. He works at a fur farm and quite often he would come home with very dirty clothes that had a very bad odor. After he purchased a Complete Laundry System he called back and expressed how happy he was to have fresh, clean clothing and reduced drying times. He was amazed that his clothes could smell so fresh and be entirely odor free without using a fragranced detergent or fabric softener. He was also able to set his dryer to a lower drying time and his clothes would be just as dry.

We do all of our auction programs live without any time delay, so if a customer wanted to call to share a complaint we could not screen it out. Over the course of our auction programs, I have probably sold over 150 Wonder Laundry Balls and Complete Laundry Systems and I have never had a single complaint.

My family and many of my co-workers are proud to own a Wonder Laundry Ball because they work. They have a 100 percent satisfaction guarantee and everyone I've ever known who has a Wonder Laundry Ball is 100 percent satisfied. It really works!

Being Kind to the Environment

Twylia Westling • I truly love the Wonder Laundry and Dryer Balls. For some time, I have been more conscious about being kinder to where we live. I have become painfully aware of how polluted our water sources are becoming and how precious a resource water

THE WONDER LAUNDRY BALL

Continued from page 1

is. I have switched to using organic items wherever I can, and the Complete Laundry System has helped me reduce my contribution of chemicals into the water.

Because of where we live, we still use a little natural laundry detergent in each load with the Wonder Laundry Ball, but I feel better about the overall effect I am having on the water supply.

Since I started going organic, I have become very sensitive to chemical smells and I can tell when someone uses fabric softener or fragranced laundry detergent. It is so nice to pull the clothes out of the dryer and not have the smells bombard me. Since we are not using a lot of chemicals in our laundry, our clothes tend to last longer, and even without fabric softener, our clothes feel softer and nicer.

The Complete Laundry System helps our family be kinder to the environment.

The End to Bad Smelling Laundry

Kevin Roslansky, President of Helping America • I have been using the Wonder Laundry Ball for quite some time now with excellent results. I love the fact that I don't have to buy laundry detergent any more. My clothes come out clean and smelling fresh.

Before, when I did a load of towels, I would have to immediately dry them very thoroughly or they would smell terrible. If I forgot about them and left them in the dryer for a while, they smelled musty and moldy and I'd have to rewash them with a lot of detergent.

Recently, I washed a load of towels with the Wonder Laundry Ball and forgot to put them in the dryer for eight hours. I was sure that I would have to wash them again. To my surprise, they still smelled fresh, so I put them in the dryer and they came out smelling as fresh as if they had been line dried!

It's comforting to know that now my clothes have no chemicals from detergents in them and my clothes now feel so much better against my skin. The Wonder Laundry Ball is saving me a great deal of money and time!

Even Horse Blankets Come Clean

Lee and Carole Harrison • We have a health food store in Virginia and have been selling the Wonder Laundry Ball for six years. We have always been amazed at the testimonials that our customers share with us regarding the fantastic results achieved using this awesome, handy, safe to use, super cleansing, economical Wonder Laundry Ball!

One of our customers washes her horse blankets using her Wonder Laundry Ball and was amazed at how clean they became.

We now have sparkling clean laundry and we no longer have allergy problems. Our heartfelt thanks for this super convenient, wonderfully cleaning laundry ball.

Cleaning with "Ball" Water is Best

Janis • When I first heard about the Wonder Laundry Ball, I was very skeptical. It took a lot of reading about the experiences of others before I decided to try it for myself.

I can honestly say that my skepticism was unfounded. Now that I've tried it myself, I believe that the Wonder Laundry Ball is a marvelous product! Not only does it clean laundry as well as or even better than detergent,

"I have used the Wonder Laundry Ball for several years and I have recommended it to many patients. We are all happy with our clean and chemical free clothes. Save the environment—use a Wonder Laundry Ball!"

~Dr. Diane Bargonetti

but everyone who uses it helps the environment by not using the chemical filled detergents which helps you save money.

My clothes are softer and brighter than before and they feel better next to my skin. I still use a stain remover when I have food or other tough stains, but now all, yes all of the stains are gone when I take my clothes out of the washer.

The best and most unexpected benefit has been the ball water. I have never worked with a product that makes cleaning with no chemicals easier. I just fill my bucket with water and swish a Wonder Laundry Ball around in the water for a minute or two to get ball water.

I use it to clean my bathroom walls, floors, tubs, and showers. I also clean windows, crystal, mirrors, stainless steel, both granite and tile counter tops, stains on carpet or upholstery, and just about anything else you can imagine.

I no longer need to carry around different cleaning agents or make different buckets of cleaning solutions. It's so easy to just wet down my microfiber cleaning cloth, wipe the item I want to clean and then dry it with my white towels.

The ball water removes soap scum from everything in the bathroom and makes it shine like new. My granite counter tops and stainless steel appliances shine and don't streak. Crystal, mirrors, and windows sparkle. It's so easy and effortless to use.

No More Skin Irritations

Vern Schroeder • I have been using the Wonder Laundry Ball for nine years with continued great results. I have had many challenges with skin irritations. For many years I had been on a quest to find the right product to clean my clothes without causing skin breakouts. I am very thankful for the Wonder Laundry Ball.

Now it is so easy to do a load of wash without all the chemicals I used to buy and my washing machine stays very clean as well.

Yes, I was skeptical at first. I had to do the challenge, and now I am so thankful that I did. My favorite shirts, linens, and jeans are just like new. They even have some years left in them. When the linens get stored in the linen dresser, they always keep their freshness just like when they were put away.

The Wonder Laundry Ball is truly great for our Mother Earth.

Eczema Rash and Asthma Better

Gayla Moghannam • I love the Wonder Laundry Ball. It cleans perfectly, doesn't make my clothes smell funny,

and has helped improve the health of my family.

The Wonder Laundry Ball cleans as well as any petroleum based cleaner does. Many of the best selling brands are petroleum based. But the Wonder Laundry Ball isn't and it doesn't make your clothes smell.

Amazingly, using the Wonder Laundry Ball has even helped stop my daughter's eczema rash and asthma.

I bring my laundry balls on vacation because I cannot stand how the other cleaners smell. When friends give my children clothes, I am amazed by the odor from the petroleum based cleaners. I am a believer that clean should not have an odor. With the Wonder Laundry Ball, all of our clothes are spotless. The Wonder Dryer Balls help dry our clothes faster than ever.

Since it is all natural with healing minerals, we also use the Wonder Laundry Ball to create water that is great for everything from cleaning hardwood floors, to taking a soothing bath, to cleaning the car, and getting food stains off the sofa.

I recommend the Complete Laundry System to all of my friends.

Save Money and the Environment

Chris Tudury • I have been using the Complete Laundry System for over a year. I have also purchased three additional sets for my family and have shared the information with many friends.

The obvious attraction for me was the savings of not having to buy laundry detergent and dryer sheets. The Complete Laundry System is very "Green" and I no longer have to have any concerns about using chemicals in traditional laundry products that hurt the environment.

After a year, my family's clothes are consistently clean, fresh, and looking good. A huge bonus for me is that I seem to have tamed my ongoing battle with eczema. I give a lot of the credit to the Wonder Laundry Ball.

Even Diapers Come Clean

Katrina Abrams • I have been using the Wonder Laundry Ball for about 10 years. I first decided to give it a try just for kicks and I wasn't expecting much. I had always used regular detergent: any brand from any store, as long as it was unscented. The Wonder Laundry Ball intrigued me because how could something that looked something like a dog toy really clean my laundry.

The first load of laundry I washed with the ball was our bedding. When I crawled into bed that night, I noticed the freshness of the sheets. I was used to having unscented sheets, but this non-scent was different, a smell that was like fresh, clean air after a thunderstorm. I loved it!

I've been using it ever since. The big test came when I had my second child and chose to use cloth diapers. At first I thought the ball wouldn't be strong enough to do the job, so I switched back to detergent, but I still used the ball on the rest of the household laundry.

After about three months of washing diapers with detergent, I started to get build up and odors in the diapers. I wondered if the Wonder Laundry Ball could eliminate the detergent build up, so I tried it just for that purpose. It worked beautifully, so I thought that maybe the Wonder Laundry Ball could just wash the diapers by itself. I tried it and it worked great, better than the detergent ever did!

For the next two years, I washed my daughter's diapers with the Wonder Laundry Ball. At first, I experimented with a few other detergents or methods, like

Continued on page 4

REVOLUTIONIZE THE WAY YOU DO LAUNDRY

Continued from page 1

and fillers act as magnets to attract dirt and stains. So after three to four washings using the Wonder Laundry Ball, all of the old residue will be gone and with it will go much of the old dinginess and stains that were in the garment. It is important to know that not all stains will come out. It can depend on the weave of the fabric.

Also, if you overload your washer, your clothes will not come out as clean. You can compare an overloaded washer to a magnet picking up steel filings. The magnet can only pick up so much of them. Your washing machine works the same way. It needs the water flow to properly clean all of the dirt out of your clothes.

After your clothes have been washed three to four times using the Wonder Laundry Ball, they will be very clean. And as long as they are not very soiled, you could even wash them without using the rinse cycle.

The impact on a household budget can be amazing. Many people spend 8 to 12 dollars a month on detergent and fabric softener alone. When you add that monthly cost to the cost of replacing clothes more often, the amount you can save is in the hundreds of dollars a year. You may even extend the life of the washer.

The Wonder Dryer Balls work so well that they will actually help cut your drying time in half. Therefore, the portion of your electric bill for dryer use can be cut up to half as well. The Wonder Dryer Balls work by keeping the clothes in the dryer separated and by redistributing

the heat more evenly throughout the dryer.

The Wonder Laundry Ball has another use besides the laundry. Many of my customers make "Ball" water by putting the Wonder Laundry Ball into water outside of the washer. The "Ball" water is very thin and it works great for many things, including watering plants, washing windows, creating great bath water, and basically anything else that you need to use water for.

Through the years that I have offered the Wonder Laundry Ball, there have been many skeptics. Most of those skeptics have instead become some of my most passionate customers. In 1998, a television news broadcast conducted a review on the Wonder Laundry Ball in a consumer protection segment. This type of review is where the news station has laboratories conduct tests, and consumers put the product to test in real life, to see if the product really is what the manufacturer says it is.

For three weeks, a testing lab used the Wonder Laundry Ball. Their conclusions were that the Wonder Laundry Ball does work and that it can clean clothes. The consumers were also very happy with the results. The towels were fluffier and clean.

The Wonder Laundry Ball is like my third baby. It is my passion to share it. I have always liked doing things differently. I really want to make a difference in the world and help Mother Nature make the world be a

better place. If I can keep chemicals and detergents from being put into our water supply, I feel that I am making a difference in the world. I believe in helping in any way I can, and with the Wonder Laundry Ball, I feel like I am helping the world become a better place.

The Wonder Ball can be found in every state of the United States and in many countries all over the world such as Germany, China, Australia, England, and Denmark.

My customers have helped me with many different applications of the Wonder Ball. Their suggestions have brought about the Spray Vial, Toilet Tank Conditioner, Jesn Ball, and BennLu Sticks.

An experiment my son conducted in 2005 showed that the ball not only breaks water down to its finest state, but it also works with gasoline. He carefully measured equal amounts of gas and ran the gas through a Honda engine. Some of the gas was introduced to the Wonder Laundry Ball. The Honda engine ran five percent longer on the gas that was energized by the Wonder Ball.

The principle of using the Wonder Ball is very similar to when our Forefathers used the water to clean clothes with that flowed over the magnetized lodestone of the water falls.

Laundry is really easy to do when using the Wonder Laundry Ball and Wonder Dryer Balls.

PERSONAL EXPERIENCES WITH THE WONDER LAUNDRY BALL

Continued from page 3

baking soda, but I always concluded that the Wonder Laundry Ball did a better job.

My daughter is now five. About two weeks ago, I found a box of cloth diapers stored in the closet. They still smelled clean! I'd been concerned about some residue turning yucky, but it wasn't an issue. Many moms who use cloth diapers know how the detergent build up and resulting smell is a recurring issue. Some people have a hard time believing that the Wonder Laundry Ball works so well. When I show them the results, they are always amazed.

I am still a happy user of the Wonder Laundry Ball. I don't use any detergent, but I do pretreat stains. I find that I usually don't need fabric softener. The Wonder Dryer Balls also work well. Even denim comes out of the dryer nice and soft.

I Use "Ball" Water for Everything

Casey Cockerham • I adore my laundry ball and can't imagine using anything else to do laundry or clean with. My clothes are soft and clean and my colors are bright. Stains are like a thing of the past. Even if you do drop something on your clothing, it just seems to wash right out with little or no extra effort. My seven month old grand daughter lives with me and her clothes are always

stain free and look like new.

As for other cleaning, I use "Ball" water for everything. The smells of cleaners are so offensive to me, I couldn't imagine using them in my home. I use "Ball" water for bathing, mopping, watering plants, cleaning the coffee maker, bathrooms, windows, dusting, styling my hair, drinking water for my cats, water for the humidifier, and the list just continues!

It's wonderful to know that I can do all of this with a non-toxic product. That means everything to me.

Laundry Costs Down

Trevor Takayama • I bought the Complete Laundry System and I use it every time I do laundry. I would never go back to doing laundry without it!

The Wonder Laundry Ball cuts my laundry detergent costs while making my clothes super clean. The Wonder Dryer Balls cut my energy costs while fluffing all of my clothes. My clothes feel so much softer!

Laundry Clean with Cold Water

Joan D. • I have been using the Wonder Laundry Ball and the Wonder Dryer Balls for about a month. The inside of my entire house is in the process of being

painted and I have accumulated a lot of laundry from moving things around.

From the first load of wash using the Wonder Laundry Ball, with no soap at all, I was amazed at the wonderful results. The laundry is clean using cold water, and the total lack of scent reminds me of when I was a child and my mother hung our laundry outside to dry.

There were a few items that took about three washings to remove stains. As advised on the directions, a few washings removes the soap residue and opens the fibers of the materials and releases the stains and dirt.

I have washed everything from delicates to large comforters using the laundry ball and I am so grateful for this environmentally safe and chemical free way of doing laundry.

Laundry Balls Live Up to Claims

Melvin Walz • I learned about the Wonder Laundry Ball about 11 years ago. The Wonder Laundry Ball and the Wonder Dryer Balls do everything they said they would do. I have shared the Complete Laundry System with several families and they have asked for more to share with their children. I love it and will never go back to using laundry soap.
